

DANIEL M. DINAKARAPANDIAN

School of Chemical & Biomolecular Engineering, Georgia Institute of Technology
dmd9@gatech.edu | ORCID: 0009-0000-0081-3958 | [linkedin.com/in/danielmanogaran](https://www.linkedin.com/in/danielmanogaran)

Research Interests: biomolecular assembly, amyloid oligomers, designer peptides, molecular dynamics, physical biology of disease.

EDUCATION

Ph.D., Chemical Engineering Aug 2022 – Present
Georgia Institute of Technology, Atlanta, GA. Advisor: Prof. Anant K. Paravastu.

B.Tech., Chemical Engineering May 2018
Anna University, Chennai, India. First Class with Distinction.

RESEARCH EXPERIENCE

Graduate Research Assistant, Paravastu Lab Aug 2022 – Present
School of Chemical & Biomolecular Engineering, Georgia Tech.

- *Thesis (in progress):* Controlling Alzheimer's Amyloid- β 42 Oligomer Formation by Pathway Selection
- Developed a protocol for preparing A β 42 oligomers in the quantity and quality needed for solid-state NMR (*Methods in Enzymology*, 2026).
- With the Wood and Raskatov labs, showed that side-chain deamidation at Q15 or N27 redirects A β 42 aggregation and dampens microglial inflammatory responses (*ACS Chemical Neuroscience*, 2025 and 2026).
- Apply solid-state NMR, cryo-EM, SEC, CD, FTIR, mass spectrometry (TIMS-TOF), and mass photometry to characterize A β 42 oligomers, fibrils, and designer α -helical assemblies.
- Run all-atom and coarse-grained MD simulations (NAMD, MARTINI 3) on A β (16–22) registry states and A β 42 self-assembly; develop Python tools for NMR data analysis and biophysical workflows.
- Mentor 10+ undergraduate researchers.

PUBLICATIONS

[†] Co-first author. Names in **bold** indicate the author of this CV.

CONFERENCE PRESENTATIONS

Talks

- **Dinakarapandian, D.M.**, Ramaswamy, P., Griffin, M., Sudarshan, T.R., Wood, L., Paravastu, A.K. AIChE Annual Meeting 2025 (American Institute of Chemical Engineers). “Deamidation in Alzheimer’s amyloid beta (1–42) redirects aggregation pathways and reduces toxic oligomer formation.”
- **Dinakarapandian, D.M.** Georgia Magnetic Resonance Symposium, hosted by Emory University, Atlanta, GA. “The distinction between amyloid fibril and oligomer assembly pathways for Alzheimer’s amyloid- β peptides.” Dec 12, 2024. *Invited talk*.

Posters

- **Dinakarapandian, D.M.**, et al. ACS Spring 2026 (American Chemical Society), “Deamidation of amyloid beta(1–42) redirects aggregation pathway and alters microglial response.”
- **Dinakarapandian, D.M.**, Das, A., Robang, A.S., Conticello, V.P., Paravastu, A.K. SERMACS 2024 (Southeastern Regional Meeting of the American Chemical Society). “Combining solid-state NMR and cryo-EM to probe structure of a designer α -helical filament.” Presented at the 52nd Southeastern Magnetic Resonance Conference (SEMRC) session. **Best Poster Award**.

PEER REVIEW

Reviewer, <i>Communications Chemistry</i> (Springer Nature)	2026
Book chapter reviewer, <i>Fibrous Proteins: Structures and Mechanisms</i> (Springer Nature)	2025
Reviewer, President’s Undergraduate Research Awards (PURA), Georgia Tech	Fall 2025

AWARDS & HONORS

- Eckert Graduate Fellowship, School of Chemical & Biomolecular Engineering, Georgia Tech 2026
- Best Mentor Award, Nakatani Foundation/Georgia Tech 2025
- Best Poster Award, Southeastern Magnetic Resonance Conference (SEMRC) 2024
- Petit Mentorship Award, Georgia Tech 2024
- BASF Capstone Scholarship, Georgia Tech 2024
- First Class with Distinction, Department of Chemical Engineering, Anna University 2018

INDUSTRY EXPERIENCE

Data Analyst, Alexa Shopping — Amazon Inc.
Chennai, India.

Oct 2021 – Aug 2022

- Conducted root-cause analysis of voice-query goal success/failure rates across US, UK, and AU domains; partnered with the Natural Language Understanding team to fix recurring failures in ASR, Intent, and Alexa neural-network components.
- Built 10+ automated workflows (GYRO module, Redshift) that streamlined data-processing pipelines for ASR diagnostics.

Process Engineer — Manali Petrochemicals Ltd.
Chennai, India.

Oct 2018 – Sep 2021

- Drove plant-productivity projects across adsorption towers, multi-effect evaporators, and distillation columns (pressurized and vacuum) to improve capacity and reduce cost.
- Improved plant data-analytics integration with Yokogawa Centum-VP DCS, reducing downtime and improving cost efficiency.

LEADERSHIP & SERVICE

Nakatani Graduate Mentor

Fall 2025 & Fall 2026

Nakatani Research & International Experiences for students, Nakatani Foundation/Georgia Tech.

Petit Scholars Mentor

2025

Petit Undergraduate Research Scholars Program, Parker H. Petit Institute for Bioengineering and Bioscience, Georgia Tech.

TECHNICAL SKILLS

Structural & Biophysical: solid-state NMR; solution NMR; cryo-EM; SEC/FPLC; RP-HPLC; circular dichroism; FTIR; LC-MS; native mass spectrometry (TIMS-TOF); mass photometry; SDS-PAGE; solid-phase peptide synthesis (Fmoc, CEM Liberty Blue).

Computational: Python, R, MATLAB, Mathematica; NAMD, VMD, GROMACS; MARTINI 3, CALVADOS 2; SPINEVOLUTION; Packmol, MDAnalysis, DSSP; Aspen.
